

## Simplicity Package

1. SSEN will aim to issue 15 'Event Requests' by the MSP End Date.
2. The MSP 'End Date' is either the last day of the MSP agreement (12 months after the start date), or the day that you have 'Successfully Deliver' your 10th event.
3. If SSEN does not request all 15 events by the end of your MSP contract date, then these 'Uninstructed Events' may be considered as having been delivered by you successfully.
4. For an event to be considered to have been 'Successfully Delivered' it should either be an 'Uninstructed Event' (as described above) or for 'Requested Events', you need to have delivered at least 65% (or more) of the flexible capacity you were contracted to deliver for each event. This will be evidenced by your meter data.
